Programming - Motion

For Students!

Visit the Class Web Site for Instructions and Time Saving Hints!

Your Mission:

You will learn how to program your robot to move in different directions. You will then program it to follow the path shown in the website video and map below. It shall always move in a straight path and not touch any of the colored lines. When your robot comes to a stop in the corresponding red striped area, your mission will be considered a success. **Good Luck!**

Summary	Description	Instructor Initial of Completion
Task #1: Move Straight	Visit the Class Web Site for Instructions and Time Saving Hints!	
Task #2 : Forward Motion and Turns.	Visit the Class Web Site for Instructions and Time Saving Hints!	
Task#3: Backward Motion & Turns.	Visit the Class Web Site for Instructions and Time Saving Hints!	
Task #4: The Maze	Visit the Class Web Site for Instructions and Time Saving Hints!	

"The Maze"
