

# Photoshop: My Friend Barack (40pts.)

## Layers & Selection

<p><b>Design:</b> Imagine a scene in which you bring together three different images and you layer and blend them in a way that everyone viewing the image feels it is real. The image above is three layers: 1. The background layer with the tree and the view. 2. The middle layer containing President Barak Obama.. 3. The highest layer is the image of all the friends.</p>	
<p><b>Step #1: Canvas</b> Set the canvas to 8 inches wide by 6 inches high / 72 dpi / RGB.</p>	5 pts.
<p><b>Step #2: Find an Image</b> Find an image of a famous individual on the internet. Save it to a folder on your desktop called "MyFamousFriend_YourName".</p>	5 pts.
<p><b>Step #3: Import to Canvas</b> Import this image to your canvas and remove any background stuff or colors that surround the famous individual.</p>	10 pts.
<p><b>Step #4: Take Photo – Green Screen – Import to Canvas</b> Take a photo of just you or you and your friends in front of the green screen.</p>	10 pts.
<p><b>Step #5: Background</b> Go online and find a realistic backdrop that will appear behind you and your friends (Be realistic, if you are wearing school clothes, you don't want to select a beach scene). Save the image to the folder you created. Import the image to the canvas. Place in the background and resize it so that it fills the entire background. Slightly move and adjust the size of both the background and your group of friends so it looks real.</p>	10 pts.
<p><b>Step #6: Export</b> Export this image to your desktop and then drag and drop it in the folder for this assignment that is in the RLSMultimediaServer.</p>
