Reflection of the Collaborative Process and Program Development
Gradesheet (60pts.)

After completing your project, respond to each of the following reflection questions. **Your response to any one prompt must not exceed 300 words.**

1. Describe the program your **group** was trying to build. *(5pts.)*

_____

_____

_____

2. Provide a brief overview of the program **you** were trying to create. *(5pts.)*

_____

_____

3. Explain how your program code works. *(5pts.)*

_____

_____

4. Describe the most important program features, rather than providing a line-by-line summary of the program code. *(5pts.)*

_____

_____

_____

5. Describe the most difficult programming problem you encountered while writing your individual code. What was the difficulty? Explain how you resolved it. *(10pts.)*

_____

_____

_____

_____

6. Identify an abstraction used in your program; explain how it helped manage the complexity of your program. *(10pts.)*

_____

_____

_____

7. Explain in detail points in your development process where collaboration was used. *(10pts.)*

_____

_____

_____

8. Explain how this collaboration affected your program development. Cite specific examples from the collaboration, such as how the group worked together to arrive at solutions, or feedback that you gave and received. *(10pts.)*
