

Unit III – Intro To Programming

Test (50 pts.)

If your sentence does not have correct sentence structure (subject/verb/object, grammar, punctuation), then I won't give you credit. Don't be sloppy/lazy when writing. Don't assume that you are clearly communicating the ideas in your head to me. Remember...I gave you all the vocabulary terms and definitions in advance. So take your time and be precise in your word choice and how you organize each sentence.

First, clearly **Define** the term below. Second **Explain** where and how you used it in this unit.

1. Abstraction (5 pts.)

a. Define: _____

b. Explain: _____

2. Function (5 pts.)

a. Define: _____

b. Explain: _____

3. Parameter (5 pts.)

a. Define: _____

b. Explain: _____

Now, clearly explain the relationship between Abstraction, Function, and a Parameter. (10pts.)

First, clearly **Define** the term below. Second **Explain** where and how you used it in this unit.

4. Algorithm (5 pts.)

a. Define: _____

b. Explain: _____

5. Code (5 pts.)

a. Define: _____

b. Explain: _____

6. Program (5 pts.)

a. Define: _____

b. Explain: _____

Now, clearly explain the relationship between Algorithm, Code, and a Program. (10pts.)
